

Environmental Policy for ECG

1 INTRODUCTION

ECG provides medical training services. We recognise that our operations have an effect on the environment and we wish to minimise any potentially harmful effects of such activity wherever and whenever possible. We also recognise that good environmental management must be an integral and fundamental part of our corporate business strategy.

2 POLICY STATEMENT

Our policy is to meet or exceed all environmental regulations, laws and codes of practice. We are committed to the prevention of pollution and to minimising the impact of our operations on the environment. This environmental policy is the company's statement of environmental goals which outline our commitment to continual environmental improvement. We will seek to achieve and maintain the recognized environmental standard ISO 14001.

3 COMMUNICATION TO STAFF

To be successful, the environmental policy needs to be company-wide with commitment from the whole workforce. Jane Lambert has specific responsibility for policy development, coordination and evaluation of performance. The administration team will support other employees / trainers in understanding and implementing the relevant aspects of this policy in their day-to-day work. This will be achieved through regular communication of objectives, action plans and achievements via newsletter, staff training and team meetings.

4 COMMUNICATION WITH INTERESTED PARTIES

ECG will document and respond to any enquiries from individuals or groups concerned with or affected by the Environment performance of ECG.

The Environment Policy will be made available to any individual or organisation requesting a copy. A facility to request details of this Policy is available on the company website.

5 GOALS

The documented strategic objectives will include a specific environmental goal.

5.4 Energy Use

We will use environmentally safe and sustainable energy sources to meet our needs.

5.5 Resources

We will improve our environmental performance by conserving energy, water, wood, paper and other resources, particularly those which are scarce or non renewable, through efficient use and careful planning, while still providing a safe and comfortable working environment.

5.6 Products

We will consider the environmental impacts of our products at all stages of their life cycle from design, to manufacturing, customer use, and finally disposal.

5.7 Recycling

We will promote recycling and the use of recycled and refurbished products and materials where such alternatives are economical and suitable, while reducing consumption of materials wherever possible.

5.8 Waste Disposal

We will minimise waste, especially hazardous waste, in all our operations and product development and will dispose of all waste through safe and responsible methods.

5.9 Wildlife

We will ensure that any products used or derived from wildlife, such as timber and plants, are from sustainable sources, and comply with EU and international trading rules.

5.10 Suppliers

We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation through a quality purchasing policy.

5.11 Transportation

Through coordinating route planning and delivery schedules we will seek to realise the dual benefits of reduced fuel consumption and lower exhaust emissions.

5.12 Buildings

We will ensure, where practicable, that buildings occupied by us are designed, constructed and operated to optimise their environmental performance.

5.13 Training

We include environmental issues in all company training programmes and encourage the implementation by all company staff of sound environmental practices.

6 POLICY REVIEW

This environmental policy will be reviewed regularly and, if necessary, revised to reflect the latest developments. We will conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations. External verification in relation to ISO 14001 will be scheduled annually.
